# THE IMPACT OF DOLLARS RAISED

**Since 2009, the supporters of JGH's cancer fundraising events have raised over \$60 million.** Funds support vital cancer research, treatment, care and prevention programs at the Jewish General Hospital's Segal Cancer Centre.

The Jewish General Hospital's Segal Cancer Centre is a leader in Quebec for implementing a focused and comprehensive approach to fighting cancer through medical treatment, patient care, family support and research, housing scientists and clinicians under one roof. The Jewish General Hospital's world-leading team of healthcare professionals are working to develop new technologies and protocols in molecular diagnostics, functional imaging, biomarkers, molecular target discovery and validation, and advanced targeted radiation therapy.

Funds raised through **Le Week-end pour combattre le cancer** are put to immediate use in order to attract and retain recognized doctors, scientists and researchers and implement transformational cancer research, treatment and care.
